

CATHRYN BANG + PARTNERS

Cathryn Bang
Principal

Highly regarded for her ability to listen and engage clients in the planning/design process, Cathryn Bang has over 17 million square feet of experience in master planning, programming, medical planning and design of prestigious healthcare facilities projects which have helped to craft her vision, resourcefulness, and expertise in dealing with complex planning issues. Fluent in the language of healthcare, she has in-depth knowledge and understanding concerning client's goals, evolution of the market, care model and environment of care issues that have proven to be a key component in the development of her notable career as a healthcare planner. Ms. Bang's 25 years of healthcare experience has also honed her problem solving skills and given her an ability to bring innovation/transformation, foster creative investigation and the exchange of new ideas.

Ms. Bang brings a strategic orientation and operational perspective to her planning work. She has been recognized for her planning solutions that are not only highly aesthetic, but promote operational efficiency, user satisfaction, functionality and flexibility. She is also very aware of the latest medical technologies, assisting clients in selecting what is most appropriate to their needs. In particular, Ms. Bang has played a key role as lead healthcare planner in the planning and design of "prominent projects" that include the nation's leading teaching hospitals. Many of her projects have been published in prestigious national and international journals and won high-honor design awards. Ms. Bang frequently speaks at universities and healthcare conferences internationally.

Project Experience

New York Presbyterian Cornell/Columbia Medical Center, New York, NY

Facility Planning, Programming, conceptual and detailed planning for new Faculty Group Practices, Geriatrics Care Center, Pediatrics Care Center, Diagnostic Center, and Emergency Department.

North Shore+Long Island Jewish Health System, Long Island, NY

Facility Planning, programming, conceptual detailed planning for new Faculty Group Practices, Diagnostic Imaging Center, Ambulatory Care Center, Carvio Vascular Services, Diagnostic Procedures Center, Breast Center, Interventional Imaging Center and Emergency Department.

Los Angeles County + USC Medical Center, Los Angeles, CA

Master planning, programming, conceptual and detailed planning for a new 1.47 million sf, 600-bed teaching hospital affiliated with the University of Southern California School of Medicine.

UCLA Academic Health Center, Westwood, CA

Master planning programming and planning for a new 1.1 million sf. 500-bed academic health center.

UCSF + Central California Regional Center, Fresno, CA

Master planning and conceptual detailed planning for a new 350,000 sf level trauma center and critical center, affiliated with the University of California at San Francisco, School of Medicine.

Yonsei University Severance Hospital, Korea

Master planning, conceptual and detailed planning and design for a new 1.6 million sf, 1,006 bed facility for the largest medical school in Korea.

Catholic University Medical Center, Korea

Master planning, programming, conceptual and detailed planning and design for a new 200,000 sf patient power facilities.

Simi Valley Hospital and Health Centers, Simi Valley, CA

Master planning, programming, conceptual and detailed planning and design for a new 200,000 sf Inpatient Tower.

CATHRYN BANG + PARTNERS

Cathryn Bang
Principal

Los Angeles County Olive View + UCLA Medical Center, Sylmar, CA

Master planning and conceptual and detailed planning for a new 200,000 sf Emergency Center and Women's Center facilities, affiliated with UCLA School of Medicine.

Los Angeles County East Valley Medical Center and MOB, City of Industry, CA

Master Planning, conceptual and detailed planning and design for a new 450,000sf, 350-bed hospital and MOB facilities affiliated with USC School of Medicine.

Veterans Administration Travis Medical center, Travis, CA

Master planning and conceptual detailed planning for a new and remodeled 500,000 sf VA and Air Force Joint Medical Center and Research.
