

**UCLA New Health Sciences Campus**  
Los Angeles, California

This project consists of the master planning and programming, conceptual and pre-schematic planning/design of the new Westwood Health Sciences Campus and Hospital of the UCLA Academic Health Center. The program includes many innovative concepts to create the campus plan and building development vision, ensuring future flexibility. Included in the plan is the Ambulatory Outpatient Care Center, UCLA Academic Medical Center Hospital, UCLA Children's Hospital, UCLA Neuropsychiatric Hospital, Biomedical Library, Research Laboratories, and Parking Structures.

This project offered unique opportunities to create an innovative future-embracing clinical setting for patient care and teaching well into the 21st century and for UCLA to maintain preeminent position as a leading academic health center.
